

Welcome to Section!

Week 2

Slides created by Cameron Mohne and Maggie Lee

Agenda

1.

Check-In

How are we all doing?

2.

Section Problem

Another fun, challenging, and engaging Karel problem

3.

Bonus Problem:

Expanding on Karel or diving into consoles!

Before We Start...

How are you all doing!? Hopefully your first week of CIP went well!

Breakout Room Activity

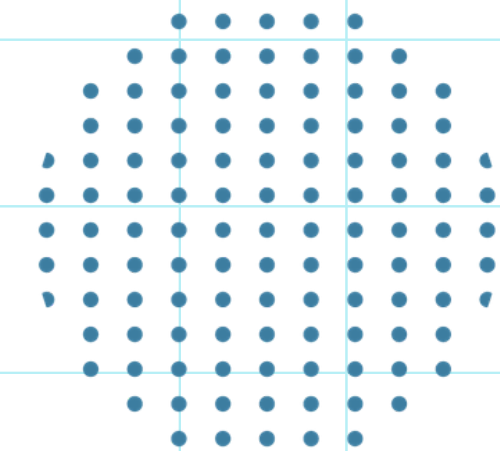

Take a few minutes to introduce yourself & talk with your section-mates.

- Your name and where you are from
- If you had to eat only one food for the rest of your life, what would it be?

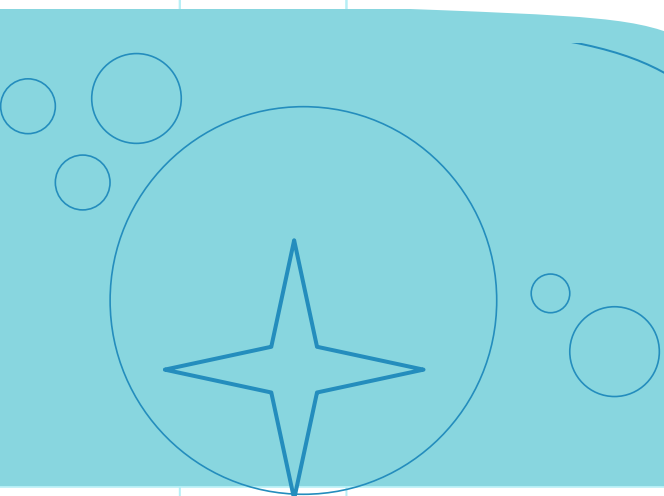

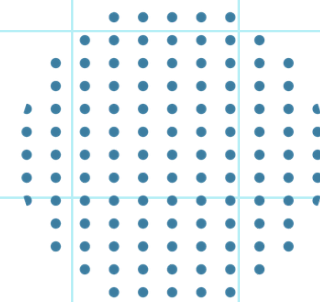

A CIP student baked these!

**Are there any
questions?**

Section Problem

Another Karel problem! This time, we want to do something that is algorithmically interesting and challenging. This is intended to be harder than last week's section problem!

Section Problem: Spread Beepers

Sample Starting World

We have some amount of beepers which are stacked in a single pile.

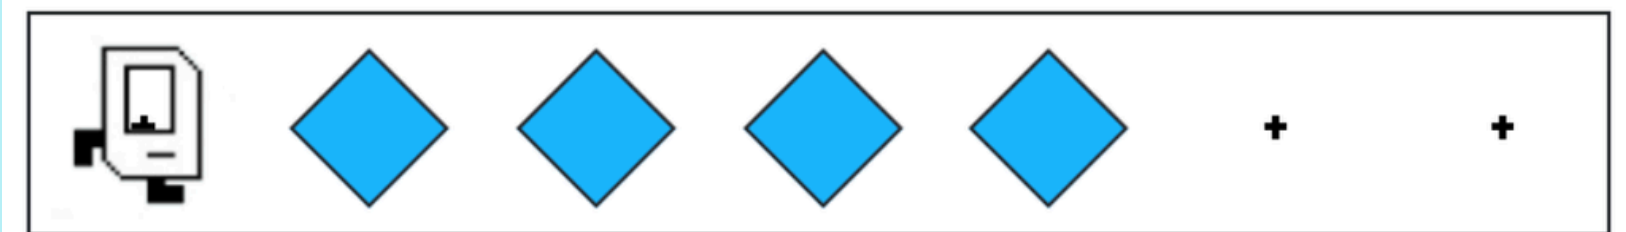

Before:

Sample Output World

We want to take these beepers and spread them out across the row.

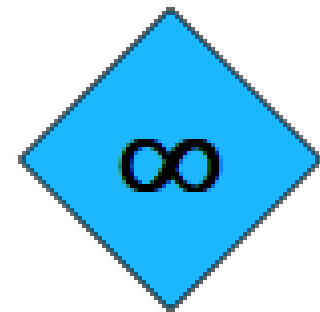

After:

Key Problem Details

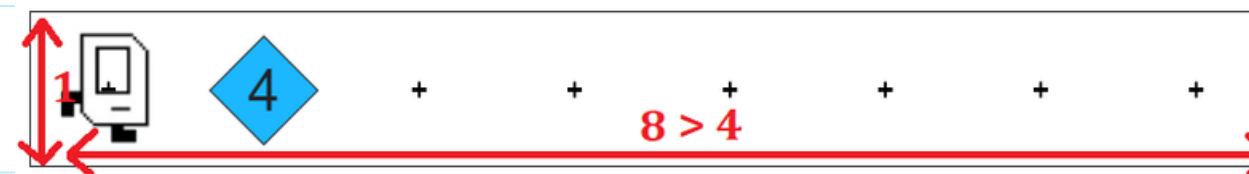

Beeper

The “catch” to this problem?
Karel has infinite beepers in
its bag

World Attributes

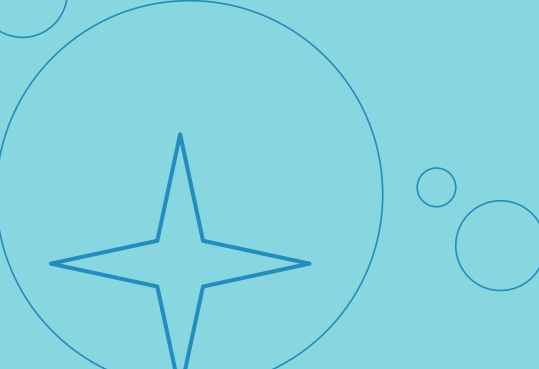

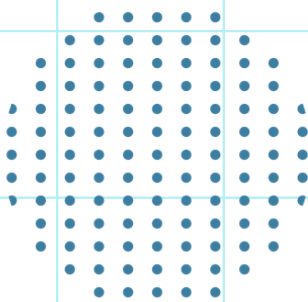

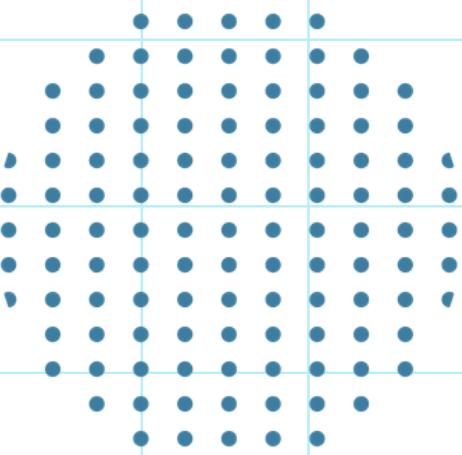

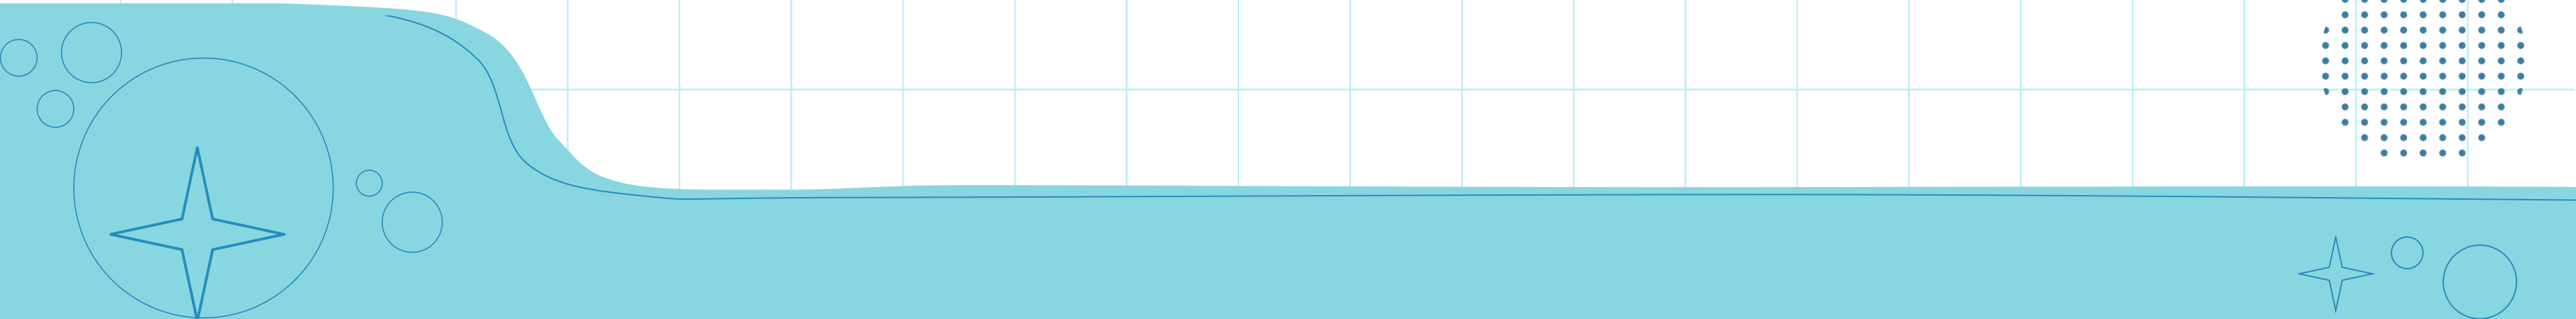

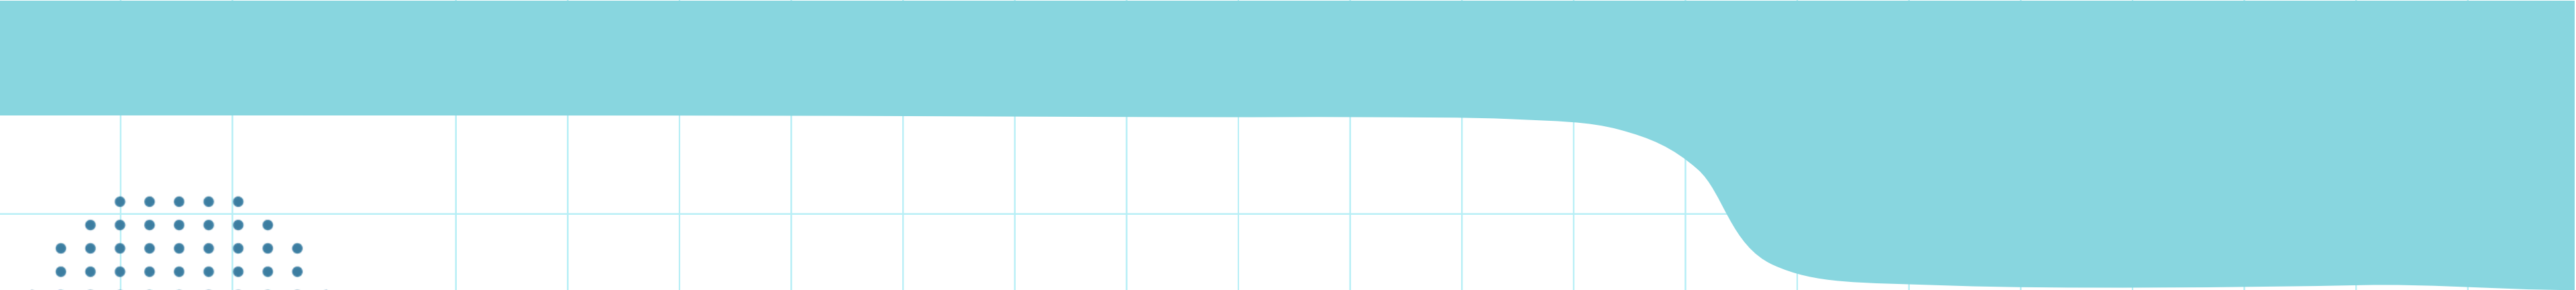

There is only one row in the
world. The world is wide
enough for all of the beepers

Locations

The pile of beepers is on the
second column. (In front of
where Karel starts.)

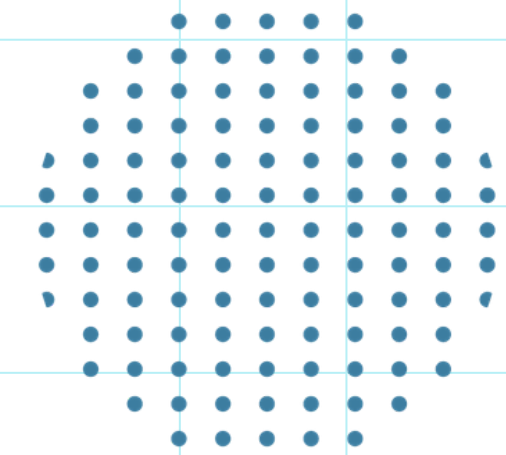

Are there any
questions about
the problem?

Let's code this up!

Would you all prefer to do this in
breakout rooms or as a whole group?

What were your
thoughts on the
problem?
